**LIQUID TECHNOLOGY ADDS MOBILE HARD DRIVE SHREDDING SERVICES**

New York, NY February 8, 2010 — Liquid Technology, a computer liquidation and data destruction company based in New York's historic Brooklyn Army Terminal (BAT), recently announced that it is introducing mobile hard drive shredding to its comprehensive list of asset management services.

“We are excited about the opportunity our new shred truck brings to our company,” said Richard Greene, Liquid Technology's Vice President of Operations. “We are one of the few data destruction companies with the mobile technology necessary for providing state-of-the-art data destruction that is just as secure and thorough as our traditional off-site methods,” stated Greene.

Liquid Technology's new shred truck now makes it possible to have data destruction services performed at your place of business, thus eliminating any chain of custody or transportation concerns. Additionally, this new, technologically-advanced mobile shredding solution is capable of providing clients with all of the assurances afforded to Liquid Technology's traditional shredding methods, including DOD compliance, professional liability insurance protection, auditable reports and a DVD video of the actual destruction of the equipment.

Liquid Technology also adheres to a no-landfill policy that ensures all scrap is recycled or reused in an environmentally friendly manner.

“Our new mobile shredding truck can drive right up to your door, anywhere in the United States or Canada, and provide safe, secure and auditable data destruction services faster and more effective than ever before,” added Greene, “We are excited about the potential of growth in this area of industry that has until now, been a non-factor.”

**About Liquid Technology**

Liquid Technology is a full-service I.T. asset management company that offers a complete suite of services designed to help companies manage their hardware assets. These services include Brokering and Purchasing Excess I.T. Equipment, Auditable Data Destruction, Environmental Disposal of Electronic Waste and I.T. Asset Management.

Liquid Technology was named to the 2008 Inc. 5,000 List as one of the fastest growing private companies in the United States.
