**Liquid Technology Signs Data Destruction Contract with Large Northeast Utility Company**

New York, NY, July 2009 – Liquid Technology, an Inc. 5000 I.T. asset management company and one of the [Top 100 Businesses in New York-Northern New Jersey-Long Island, NY-NJ-PA](#), today announced the acceptance of an exclusive 5-year data destruction contract with a major utility company headquartered in the Northeast region of the United States.

Richard Greene, VP of Operations for Liquid Technology, commented, “By securing a long-term contract of this magnitude, we continue to expand our position as a market leader within the data destruction industry. With a number of similar contracts currently in negotiations, this is certainly an exciting time for Liquid Technology.” Greene also added, “We are seeing greater concern by our clients to have D.O.D., SOX, and PCI-compliant solutions implemented. This has been a primary driver for much of our new business.”

As part of this exclusive contract, Liquid Technology consultants will be working with the utility company’s I.T. managers to integrate best-of-breed data destruction software into their existing infrastructure.

“The software we incorporate allows our clients to fully ratify and stabilize any potential high-level security concerns,” said Greene, “This on-site user-level solution is ideal for clients looking for a cost-effective means of improving the integrity of their data storage and/or the destruction of that data.”

**About Liquid Technology**

Liquid Technology is a full-service I.T. asset management company that offers a complete suite of services designed to help companies manage their hardware assets. These services include Brokering and Purchasing Excess I.T. Equipment, Auditable Data Destruction, Environmental Disposal of Electronic Waste and I.T. Asset Management. Liquid Technology was named to the 2008 Inc. 5,000 List as one of the fastest growing private companies in the United States.
